DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/03/07 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Lardellier (U.S. Patent 4940196).

Lardellier discloses : a method for removing a nacelle assembly from an engine, the nacelle comprising a generally annular body having an air inlet and an air outlet, a first attachment means (27e) and a second attachment means (41), the generally annular body encircling a region of the engine when working in operative association with the engine, the first attachment means being attached to a rigid member and a second attachment means being attached to a casing assembly on the engine (Fig. 1; col.4, lines 41-50), the method comprising the steps of releasing the first attachment and translating the nacelle substantially parallel to the

axis of the engine (col. 5, lines 27-40), and disengaging the nacelle assembly from the casing assembly by releasing the second attachment means(41) (col. 5, lines 37-41).
